Installation instructions for Suzuki GSX-R1000 (2007-08) PAIR block-off cap

The pair block off cap is used to block off emissions (PAIR) to help prevent 'deceleration pop' and also prevents ram-air pressure loss from the airbox after blocking the PAIR.

1. Lift and prop gas tank.
2. Remove PAIR hose from air box port located on front right of air box (while seated on bike.) See figure 1.

Fig. 1.

3. Place the cap on port of air box as shown in figure 2.

Fig. 2.

4. Re-install PAIR hose over the cap and port as shown in figure 3. (Note: WD-40 may be helpful for installation.)

Fig. 3.

5. Lower tank.
